—No one ever thought of introducing so expensive a feature as lithographic color work in the days when the leading magazines sold for \$4.00 a year and 35 cents a copy. But times change, and the magazines with them. It has remained for the Cosmopolitan, sold at one dollar a year, to put in an extensive lithographic plant capable of printing 320,000 pages per day (one color). The January issue as a frontpiece a water color drawing by Eric Pape, illustrating the last story by Robert Louis Stevenson, which has probably never been expelied even in the pages of the finest dollar French periodicals. The cover of the Cosmopolitan is also changed, a drawing of page length by the famous Paris artist Rous, in lithographic color on white paper takes the place of the manila back with its red stripes. Hereafter the cover is to be a fresh surprise each month.
